ICOTS9

## Sustainability in statistics education

Flagstaff, Arizona, USA, 13-18 July, 2014

We are pleased to advise that the IASE Executive accepted the proposal made by the American Statistical Association to hold ICOTS9 in 2014 in Flagstaff, Arizona. The decision was announced at the ICOTS8 farewell dinner.

The first steps towards organising have already been taken by the IASE Executive: the conference theme has been chosen and the Scientific and Local Committees have been appointed.

The conference theme ‘**Sustainability in statistics education**’ embraces a variety of relevant meanings of the word sustain. It can mean maintain, carry on, keep going, uphold; it can mean nourish, support, feed; and it can mean encounter, experience, undergo, endure. All of these meanings have their impacts on statistics education and its learning objectives.

We shall explore our rich and diverse modes of achieving sustainability.

The International Programme Committee Executive consists of

- IPC Chair: Tim Dunne
- Scientific Co-ordinator: Gillian Lancaster
- Information Manager: John Shanks
- Programme Scheduler: Helen MacGillivray
- Editor of Proceedings: Katie Makar
- LOC Chair: Roxy Peck

The Local Organising Committee will be chaired by Roxy Peck.  
More information and web-site will be available at the end of 2012.  
Note now in your diary for 2014 the Conference venue and dates:

**DON'T MISS THE NEXT ICOTS!!!!**
