

International Poster Competition 2020–2021

How can I take part?

- Teams of two to five students
- The competition has three categories
 - 1) lower secondary school
 - 2) upper secondary general school/upper secondary educational institutions
 - 3) university/university of applied sciences
- The theme of the poster is Environment, biology or sustainable development
- Free entry
- Registration to the competition by 15 January 2021. The poster can be made during spring and autumn terms 2020 and in January 2021
- Submission of the poster to country coordinator 28 February 2021
- The winning posters of categories are published during the ISI2021 meeting at the latest and they continue to the international competition

Why make a poster?

It is an interesting way

- to investigate real questions using statistical data
- to use your mathematical and graphical skills
- to interpret and present statistical results
- to develop your written communication skills
- to work as a team

Good prizes

- The winning posters will be displayed at various events.
- Money and product prizes are awarded in both competitions.
